analyst! Clear, concise instruction for all CFA Level I concepts and competencies for the 2017 exam. The same official curricula that CFA Program candidates receive with program registration is now available publicly for purchase. CFA Program Curriculum 2017 Level I, Volumes 1-6 provides the complete Level I Curriculum for the 2017 exam, delivering the Candidate Body of Knowledge (CBOK) with expert instruction on all ten topic areas of the CFA Program. Fundamental concepts are explained with in-depth discussion and a heavily visual style, while cases and examples demonstrate how concepts apply in real-world scenarios. Coverage includes ethical and professional standards, quantitative analysis, economics, financial reporting and analysis, corporate finance, equities, fixed income, derivatives, alternative investments, and portfolio management, all organized into individual sessions with clearly defined Learning Outcome Statements. Charts, graphs, figures, diagrams, and financial statements illustrate concepts to facilitate retention, and practice questions provide the opportunity to gauge your understanding while reinforcing important concepts. The Level I Curriculum covers a large amount of information; this set breaks the CBOK down into discrete study sessions to help you stay organized and focused on learning—not just memorizing—important CFA concepts. Learning Outcome Statement checklists guide readers to important concepts to derive from the readings. Embedded case studies and examples throughout demonstrate practical application of concepts. Figures, diagrams, and additional commentary make difficult concepts accessible. Practice problems support learning and retention. CFA Institute promotes the highest standards of ethics, education, and professional excellence among investment professionals. The CFA Program Curriculum guides you through the breadth of knowledge required to uphold these standards. The three levels of the program build on each other. Level I provides foundational knowledge and teaches the use of investment tools; Level II focuses on application of concepts and

analysis, particularly in the valuation of assets; and Level III builds toward synthesis across topics with an emphasis on portfolio management. Governance is a word that is increasingly heard and read in modern times, be it corporate governance, global governance, or investment governance. Investment governance, the central concern of this modest volume, refers to the effective employment of resources—people, policies, processes, and systems—by an individual or governing body (the fiduciary or agent) seeking to fulfil their fiduciary duty to a principal (or beneficiary) in addressing an underlying investment challenge. Effective investment governance is an enabler of good stewardship, and for this reason it should, in our view, be of interest to all fiduciaries, no matter the size of the pool of assets or the nature of the beneficiaries. To emphasize the importance of effective investment governance and to demonstrate its flexibility across organization type, we consider our investment governance process within three contexts: defined contribution (DC) plans, defined benefit (DB) plans, and endowments and foundations (E&Fs). Since the financial crisis of 2007–2008, the financial sector’s place in the economy and its methods and ethics have (rightly, in many cases) been under scrutiny. Coupled with this theme, the task of investment governance is of increasing importance due to the sheer weight of money, the retirement savings gap, demographic trends, regulation and activism, and rising standards of behavior based on higher expectations from those fiduciaries serve. These trends are at the same time related and self-reinforcing. Having explored the why of investment governance, we dedicate the remainder of the book to the question of how to bring it to bear as an essential component of good fiduciary practice. At this point, the reader might expect investment professionals to launch into a discussion about an investment process focused on the best way to capture returns. We resist this temptation. Instead, we contend that achieving outcomes on behalf of beneficiaries is as much about managing risks as it is

about capturing returns—and we mean “risks” broadly construed, not just fluctuations in asset values. Once you have passed the CFA Level I exam, you are considered to have mastered the basics and the general breadth, but not the depth, of the information necessary to function as an analyst in today's global economy. The Candidate's Guide Tutorials provides two main sections for each Study Session: 1. Book / eBook CFA Curriculum, including Concept Checks 2. Self Help and Interactive Exam Study Aid Software You begin your studies with the CFA Curriculum on Page 1. Continue your studies page-by-page; the learning outcome statements (LOS) have been re-ordered, where necessary, to make learning more intuitive than in the CFA Institute's Study Guide. Our concise writing style minimizes learning time, and there are numerous Examples to help you master every LOS. Study Guide command words are boldface in the LOS title; the examiners expect that your knowledge reflects the command word. It is suggested that you first read the Learning Outcome Statements to get familiar with the section, and answer the Assessment questions provided within the program to determine your weakest topics. Each Specific Study Session question database consists of 40+ multiple choice questions with a level of difficulty and design similar to that of the CFA examination itself. Allow 60 minutes to complete each Adaptive Exam (90 seconds per question). Adaptive Exam questions are unique to The Candidate's Guide Tutorials, so if you have also purchased other Level I Mock Exam (Morning or Afternoon Sessions) rest assured that our Adaptive Exam questions will not be repeated there. Concept Checks complete each Reading Assignment and they consist of questions to reinforce your knowledge. Answers to Concept Check questions are the end of each Study Session. A fast growing share of investors have recently widened their scope of analysis to criteria regarded as extra-financial. They are driven by different motivations. Adoption of sustainable investment strategies can be driven, on the one hand by the sole motivation to hedge portfolios against knowable risks by expanding the conceptual framework to incorporate the latest best practice in risk management. Other investors focus rather on a long-term view and make an active bet on societal change. Recent empirical research has shown that considering sustainability factors within investment practices does not come at a cost (i.e. through a reduced opportunity set) but allows for competitive returns. Furthermore, the growing market and resulting competition in the wake of sustainable investing going mainstream has the welcome effect to compress fees for such products. Hence, staying informed about recent trends in sustainable investing is imperative no matter what the main motivation is. Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely

accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
