***Explore the foundations of business law as well as the
application of legal concepts to everyday life. LAW FOR BUSINESS
AND PERSONAL USE, 19E, combines strong content and interactive
technology with consistent, proven instruction to maintain
student interest and support active learning. Coverage includes
contracts, criminal law, environmental law, family law, and
consumer protection. With more than 1,000 cases, LAW FOR
BUSINESS AND PERSONAL USE, 19E, offers plenty of opportunities
for case analysis and research. Important Notice: Media content
referenced within the product description or the product text
may not be available in the ebook version. Proceedings of a NATO***

ARW held in Vimeiro, Portugal, May 11-15, 1992 The exercising horse competes at various levels in different disciplines and is also increasingly used for leisure riding and driving as well as hobby farming and agritourism. This varied use of the horse of today creates challenges for those who are responsible for the feeding of horses, as well as to feed producers and manufacturers. This book provides an outstanding synthesis of knowledge in physiology and metabolism, nutritional requirements and feeding strategies. Use of performance aids and the question of feed contaminants and doping are explained and discussed according to EU legislation on the marketing and use of animal feeds and doping rules in horse sports. The improved knowledge and understanding of the background of the horse's performance and nutritional physiology helps to meet the nutritional requirements of working (or exercising) horses such that their genetic potential can be used properly. This book discusses the following seven subjects: -nutrients and tissue metabolism; -adaptations; -energy requirements; -protein requirements; -mineral, electrolytes and vitamins requirements and function; -feeding strategies; -performance aids and feed contaminants and doping. This book is the fourth step of further discussion on the evaluation and prediction of the requirements of different types of horses covered in the scope of the working group Nutrition of the Horse commission at European Association of Animal Production (EAAP). All those concerned by racing, riding and feeding in equine industry will enjoy this valuable resource. It is a reference book for scientists, veterinarians, advisers and practitioners in the equine industry, as well as for teachers and students in equine science. Most of us would recognize a star leader by their charisma, emotional intelligence and public communication prowess. What is truly impressive but often overlooked is the silent work of leadership that garners real results. Exercising influence in a complex and global organization – whilst also shaping and executing strategies across borders in a disruptive age – is the true mark of success as a leader. Backstage Leadership takes a comprehensive look at the background processes that leaders must master in order to shape the culture, direction and capability of a successful company. With an emphasis on strategy, the author provides an integrated toolkit for developing your knowledge and skills as a 'backstage leader.' You will learn how to: Mobilize people towards new strategic directions Scan your business environment

for threats and disruptive forces Diagnose and help to shape the culture of your organization Develop talent and capabilities towards a specific goal. Focusing on the key and consistent underlying processes of leadership, this book is essential reading for managers who wish to bring focus and coherence to their leadership role and integrate themselves within the engine of the organization. Polymers continue to show almost amazing versatility. We have always known that polymers could be used for trinkets, toys and dishes. Now, however, we are no longer surprised to encounter these adaptable materials in almost every place we look. We find them in our cars, tools, electronic devices, building materials, etc. The use of polymeric materials in medicine is also well documented in previous books by one of the Editors (Gebelein) and by others. Likewise, the use of polymeric materials in pharmaceutical applications, especially in controlled release systems, is also well established. Nevertheless, the use of these ubiquitous chemicals is far less obvious in the field of cosmetics, although modern cosmetic preparations rely heavily on polymers and this trend is certain to increase. This book brings together much of the basic information on polymers in cosmetics and compares this usage with similar applications in pharmaceutical and medical applications. Cosmetics, like medicine and pharmacy, dates back to antiquity. We can find uses of perfumes, balms and ointments in various old books, such as the Bible. For example, the use of ointments and balms is noted more than thirty eight times, and perfumes and related materials are cited at least twenty nine times in the Bible. This book focuses on a research field that is rapidly emerging as one of the most promising ones for the global optics and photonics community: the "lab-on-fiber" technology. Inspired by the well-established "lab on-a-chip" concept, this new technology essentially envisages novel and highly functionalized devices completely integrated into a single optical fiber for both communication and sensing applications. Based on the R&D experience of some of the world's leading authorities in the fields of optics, photonics, nanotechnology, and material science, this book provides a broad and accurate description of the main developments and achievements in the lab-on-fiber technology roadmap, also highlighting the new perspectives and challenges to be faced. This book is essential for scientists interested in the cutting-edge fiber optic technology, but also for graduate students.

Palm by-products represent an economical resource for the sustainable development of rural areas in many countries of the world. The book focuses on the utilization of palm by-products in the following areas: Wood Alternatives and Panels, Sustainable Energy and Fertilizers, Bio-Composites, Biomedicine and Biotechnology, Fiber, Paper, and Textile, Food Applications, Design and Architecture. Includes section "Book Reviews".

An ancient darkness A powerful family And five friends bound by magic The Breakfast Creek five survived the attack of the Red General and their jaunt through the many worlds. Now, forever joined by magic beyond their understanding, they begin their new lives in very different magical worlds. But now Julia is missing, taken by an old power that yearns, that seeks, that's growing. The Power of the Allure. Enthralled by a world of the wealthy, luxury and notoriety, Julia has no idea what she's gotten herself into. The story continues in this whirlwind tale, Book 2 of the epic adventure of five friends: The Travellers.

The book is a collection of high-quality, peer-reviewed innovative research papers from the International Conference on Signals, Machines and Automation (SIGMA 2018) held at Netaji Subhas Institute of Technology (NSIT), Delhi, India. The conference offered researchers from academic and industry the opportunity to present their original work and exchange ideas, information, techniques and applications in the field of computational intelligence, artificial intelligence and machine intelligence. The book is divided into two volumes discussing a wide variety of industrial, engineering and scientific applications of the emerging techniques. This book is a collection of selected research papers presented at the International Conference on Innovations in Electrical and Electronics Engineering (ICIEEE 2019), which was organized by the Guru Nanak Institutions, Ibrahimpatnam, Hyderabad, Telangana, India, on July 26–27, 2019. The book highlights the latest developments in electrical and electronics engineering, especially in the areas of power systems, power electronics, control systems, electrical machinery, and renewable energy. The solutions discussed here will encourage and inspire researchers, industry professionals, and policymakers to put these methods into practice. The book teaches students to model a scientific problem and write a computer program in C language to solve that problem. It introduces the basics of C language, and then describes and discusses algorithms commonly used in scientific

applications (e.g. searching, graphs, statistics, equation solving, Monte Carlo methods etc.). Complete Service Handbook for the Yanmar Marine Diesel Engines 6SY-STP2, 6SY655 and 8SY-STP.
